

ISO 12944

Certification for Coating Companies

YOUR SEAL OF QUALITY AND RELIABILITY

**Objective Testing. Comprehensible Results.
Competitive Proof.**

IFO offers certificate plans for coated steel components in accordance with all common product standards for coating quality.

ISO 12944 (wet paint, material thickness $\geq 3\text{mm}$)

DIN 55633 (powder coating, material thickness $> 3\text{mm}$)

DIN 55634 (wet paint+powder coating, material thickness $\leq 3\text{mm}$)

The IFO Institut für Oberflächentechnik GmbH is the **only** certification body to offer internationally recognized certificates according to **ISO 12944** with DAkkS accreditation. It is also recognized by all **World Trade Organizations**.

BENEFITS OF IFO CERTIFICATION

- Competitive Advantage
- Trust-building
- Transparency and Accountability
- International Recognition
- Increased Operation Quality

With our product certification, you receive recognized proof that your product meets the requirements of **DIN EN ISO 12944** – objectively tested according to clearly defined criteria.

From the application to the certification contract, the IFO certification body takes care of the organization.
